## Contractor:

**Ellingson Drainage, Inc.**  
56113 State Hwy 56, PO Box 68  
West Concord, MN 55965

## Construction Progress

The sewer mainlines are completed. Approximately 90 of the 140 grinder locations have had the service pipe drilled into the lot. Ridge Road, Cedar Trail & Cedar Circle and a few other miscellaneous areas will see service line drilling soon. You may see the service pipe temporarily sticking out of the ground, near your proposed grinder location. The lift station is complete & functional, with some site work remaining. Cole's Electric continues installing the new meter sockets on each property.

## Upcoming Schedule

Service line drilling will continue for the next 2 weeks. Grinder units will be installed after the service lines are completed. Cole's Electric will continue installing new meter socket panels on the houses. They will contact you in advance when work is planned for your property. They may also be doing some preliminary trenching, from your meter socket to the grinder location.

We appreciate your patience regarding yard disturbances & cleanup. The crews are focusing their efforts on getting as much pipe in the ground, as soon as possible, for now.

## Access

Please note: Be aware of construction vehicles & equipment along the project, there is limited space in some areas.

## Updates

Informational newsletters, such as this one, will be mailed to you periodically throughout the project.
